SUMMARY

Junior Front-End Developer with a goal to transition into a Full Stack Developer role. Skilled in collaborating effectively with senior developers, optimizing team workflows, and ensuring tasks are efficiently managed. Invested over 1000 hours in online courses and videos to master new tools and techniques, benefiting team projects. Actively contributes to open-source projects and engages with developer communities for personal growth and recognition. Proficient in using React.js and other frameworks to create user-friendly interfaces, improving efficiency, and reducing development time by 30%.

PROFESSIONAL EXPERIENCE

Digital Trend Bucket - Full-time Remote   May 2023 - Present

Web Design Artisan - Frontend Web Developer

Key Responsibilities

- Ensured website compatibility across browsers and devices through responsive design practices, ensuring seamless user interaction.
- Enhanced website performance through code optimizations, resulting in a 20% increase in visitation rate.
- Developed a custom CSS library, streamlining website creation and reducing development time by 30%.
- Developed a website within 5 days, meeting client requirements and ensuring satisfaction, showcasing strong project management skills.
- Assisted senior developers in troubleshooting and debugging code issues to enhance overall website quality and ensure code integrity.

Refresh Marketing Inc - Internship On-site   Nov 2022 - Apr 2023

Junior Web Developer

Key Responsibilities

- Developed themes and templates for the company's website builder platform, aligning with project objectives and design standards.
- Developed HTML pages for the website builder, optimizing performance and improving integration with the backend.
- Successfully completed website builder projects within tight deadlines, receiving positive feedback from clients and stakeholders.

PROJECTS

Project Name: Cryptoverse

Description: Cryptoverse, a dynamic dashboard powered by Vite React TypeScript, offers users an immersive view of the cryptocurrency market. Seamlessly optimized for mobile and tablet devices, it serves as an accessible gateway to the cryptocurrency universe. Leveraging technologies like Vite, React, TypeScript, Emotion, MUI, Tailwind CSS, Redux, Chart.js, and react-chartjs-2, Cryptoverse delivers real-time tracking and in-depth analysis, ensuring a rich user experience.

Your Role: Spearheaded the development, design, and deployment of Cryptoverse. Managed all project aspects from conception to launch, including architecture design, frontend development, API integration, and deployment. Ensured seamless execution, delivering high-quality results and an exceptional user experience.

Project Name: Full Stack Next.js Login and Signup Form

Description: Developed a comprehensive user authentication application using a stack comprising Next.js, React.js, Tailwind CSS, Material-UI (MUI), TypeScript, Node.js, MongoDB, and Mongoose. Implemented robust authentication mechanisms using JWT and bcryptjs, ensuring the security and integrity of user data. Successfully deployed on Vercel, delivering a seamless and secure authentication experience.

Your Role: Solely developed, designed, and deployed the application. Handled all aspects of the project lifecycle, including architecture design, frontend and backend development, database management, and deployment.

SKILLS

Hard Skills
Front-end: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Redux, Material-UI, SCSS, Bootstrap, Tailwind CSS
Back-end: Node.js, Express.js, MongoDB, Axios, Git/GitHub

Soft Skills
Communication, Problem-Solving, Adaptability, Collaboration, Attention to Detail, Time Management, Empathy, Resilience, Creativity

CERTIFICATES

- Full Stack Development 2024 (Udemy)
- Front End Development (Simplilearn)
